PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and deploying web, mobile, and desktop applications through freelance projects and industry internships. Proficient in React, Flutter, JavaScript, Python, SQL, and workflow automation, with experience leading development teams and delivering scalable, production-ready solutions.

EXPERIENCE

Software Engineer Intern

Feb 2026 – May 2026

City Government of Lipa

New Lipa City Hall, Lipa City

- Spearheaded the development and deployment of 4 government information systems that modernized traditional workflows through digital transformation and automation, reducing manual processing and improving service efficiency.
- Engineered database-driven solutions, automated reporting mechanisms, and workflow management features that enhanced data accuracy, accessibility, and decision-making capabilities within the organization.

Freelance Full-Stack Developer

June 2025 – Present

Freelance

Lipa City, Batangas

- Developed and deployed 7 full-stack web, mobile, and desktop applications tailored to client requirements using React, Flutter, Node.js, Next.js, Python, PostgreSQL, and C++, handling end-to-end development from system design and database integration to deployment.

PROJECTS

INVENTRACK | React, Tailwind, PostgreSQL, Python

Jan 2025 - Dec 2025

- Led a development team in designing and building a web-based inventory management platform for the GSO of Padre Garcia, Batangas. Integrated descriptive and prescriptive analytics to provide data-driven insights, optimize inventory monitoring, and support strategic decision-making for resource management.

EmpowerPWD | React, Node.js, MongoDB

Aug 2024 - Dec 2024

- Served as Co-Team Lead and Backend Developer in the development of a web-based employment platform designed to connect persons with disabilities (PWDs) with inclusive job opportunities.
- Developed and maintained server-side functionalities, RESTful APIs, database operations, and application logic using Node.js (Express) and MongoDB, enabling efficient job matching, application tracking, and user management.

Spartan Odyssey: The Programming Realm | Godot Engine, SQLite

Jan 2024 - May 2024

- Contributed as the primary Game Developer for an educational top-down adventure game that teaches SQL concepts through immersive gameplay. Designed and implemented game mechanics, player progression systems, interactive learning features, and database-driven functionality using Godot Engine, GDScript, and SQLite.

EDUCATION

Batangas State University TNEU - Lipa

Aug 2022 - July 2026

Bachelor of Science in Information Technology Major in Business Analytics

GWA: 1.69
